How IceWarp saved Bohemia Cargo s.r.o. from a system collapse

BOHEMIA CARGO[®]

the power behind

Bohemia Cargo s.r.o.

Based in the
Czech Republic

Freight
forwarder

120
users

Windows
OS

With its motto “**Our customers are always first**”, this family company has provided high-quality transport services since 1997. Starting out small in the Czech Republic, the freight forwarding and logistics firm quickly grew into an international operation offering export,

warehousing, and customs handling on a global scale. Today, Bohemia Cargo employs 180 workers, runs five branches, and exceeds a yearly turnover of over 30M EUR – and this all requires a well-oiled administration and communication system.

Case study

“

As a logistics and transport service provider, we handle thousands of emails daily. That's why we regard mail server speed, reliability, and SW support as crucial. **And there's no one better at supplying this complete package than IceWarp.**

”

PAVEL ŠŤASTNÝ,
SYSTEM ADMINISTRATOR OF BOHEMIA CARGO

Problem & Solution

Before switching to IceWarp, Bohemia Cargo had a serious issue: any action involving more than a few hundred emails bogged down their entire system, forcing other users to sit around and wait until preceding requests were handled.

When asked about their decision to upgrade, Pavel recalled the following: “We were initially interested in implementing a more robust email and communication system because of how much time was wasted by our previous structure. We turned to IceWarp for its speed, functionality, and local support. All of which came at a reasonable price.”

The issue was so bad that Pavel feared a **collapse of their mail server**. Luckily, they switched to IceWarp where they enjoy daily stability as well as advanced security and customization perks.

Benefits for Bohemia Cargo

Comprehensive migration with zero user stress

A reliable business email tool with heavy-load capabilities

Simple administration features for seamless workflow

Countless hours saved with drastically reduced wait times

“ It didn't take long for us to notice improvements after switching to IceWarp. From the moment we had it up and running, our users could perform actions that used to overload the whole server. The initial migration process also went surprisingly well; we made numerous above-standard requests, and IceWarp was able to implement them all.

IceWarp is great because it's fast, offers various server setting options, and security and user privileges you won't find anywhere else. **If you need a high-quality, reliable mail server at a price you can afford, I can't recommend IceWarp enough.** ”

PAVEL ŠŤASTNÝ,
SYSTEM ADMINISTRATOR OF BOHEMIA CARGO
